# dCS Lina IR Codes

The IR receiver on the Lina DAC is active on software version 2.0 and forwards. When the IR setting on the DAC is set to Generic, the DAC uses the modified NEC IR code base as used by Apple TV remote controls (as opposed to the RC code base used with the dCS Universal Remote).

The Generic IR setting shows as the following icon on the front panel menu of the Lina DAC: 

The following NEC codes are used on the generic setting:

- Up (0x05) – volume up
- Down (0x06) – volume down
- Left (0x04) – for navigating the menu
- Right (0x03) – for navigating the menu
- Menu (0x01) – to enter or leave the menu
- Select (0x2E followed by 0x02) – to select menu items, or mute on status screen
- Play/Pause (0x2F followed by 0x02) – Play/Pause when playing from network
